## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Kamimura et al (5,321,224). Note a process for production of an aluminum alloy component of an internal combustion engine (see column 1, lines 12-20, which includes at least one area, which during operation of the engine is thermally higher loaded than another area, comprising melting that area by means of a laser beam process , introducing an additive into the melt pool, the additive being either a ceramic material or an inter-metallic compound, resolidifying the melt pool to develop in the thermal higher loaded area a lower thermal coefficient of expansion relative to the thermal lower loaded area, wherein the component is the portion in the cylinder head between the valve bores (see Figure 12) or the component is a piston, wherein the portion is a recess edge (see Figure 13).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
